Rigid PVC is generally considered to be among the most versatile, economical, and printer friendly plastic sheets available on the market today. The outstanding durability, printability, and laminating characteristics make it the substrate of choice for credit cards, security cards, signs, displays, and a myriad of other applications.

Produced in Texas with over 30 years of technical expertise and experience, our rigid PVC is engineered for the most demanding printing jobs. With grades individually formulated for specific printing methods, we are able to offer rigid PVC for use in offset lithography, flexography, and screen process printing.

In order to remain at the forefront of the ever changing plastics industry, Hop Industries is continually updating our product lines with the latest material developments and adjusting our formulation and capabilities to meet the needs of our customers.

- Printable via offset lithography, flexography and screen printing.
- Corona treated for superior ink adhesion.
- Uniform printing surface
- Customized impact properties for die cutting
- Available in clear, white, or custom colors.
- Large stocking program allows for same day shipments.
- Custom production available with quick lead time.
